

Aggregating Specific Feature

Providing Stop Loss Options to Clients

HM Insurance Group (HM) offers a feature to clients who are looking to reduce their Stop Loss premium by assuming more claim liability. With the Aggregating Specific feature, the client agrees to accept an amount of additional risk in exchange for the financial advantage of paying lower Stop Loss premiums. This feature is solely a financial arrangement and does not impact employee medical benefits. The Aggregating Specific feature is recommended for clients financially suited to accept additional risk.

How the Aggregating Specific Feature Works

With the Aggregating Specific feature, Specific premium is reduced in exchange for the client assuming liability for a set dollar amount referred to as the Aggregating Specific Loss Fund. When an individual claim or a combination of individual claims exceeds the Specific deductible, the amount exceeding the Specific deductible is applied to the Aggregating Specific Loss Fund rather than the client receiving reimbursement. When the total excess claim amounts exceeding the Specific deductible equal the Aggregating Specific Loss Fund, the additional eligible Specific Stop Loss liability will be reimbursed up to the plan maximum.

Aggregating Specific Example – Specific Deductible: \$200,000; Aggregating Specific Loss Fund: \$75,000
*The client incurred three claims that were each **more than the \$200,000 Specific deductible**.*

Claimant	Claim Amount	Less the Specific Deductible		Amount in Excess of Specific Deductible	Amount Applied to Aggregating Specific Loss Fund	HM Reimbursement
Claimant 1	\$250,000	– \$200,000	=	\$50,000	\$50,000	\$0
Claimant 2	\$255,000	– \$200,000	=	\$55,000	\$25,000	\$30,000
Claimant 3	\$235,000	– \$200,000	=	\$35,000	\$0	\$35,000
				\$140,000	\$75,000	\$65,000

\$140,000 Excess of Specific Deductible
 – \$75,000 Aggregating Specific Deductible

\$65,000 HM Reimbursement
